

## Windshield Protection Film (WP90)

ClearPro Windshield Protection Film is a TPU material protective film applied to the outside of the windshield. It has high clarity, 99% UV barrier, high transmittance, high impact resistance, and self-healing performance, which can better protect the windshield from damage to road debris, such as rocks and pitting, and therefore prevent expensive glass replacement. Meanwhile, due to the softness of TPU material, it is also very easy installation.

CATEGORY	VALUE	CATEGORY	VALUE
Top Coating	Polyoptico™	Film Thickness	6 mil
60°Surface Gloss	95	Hydrophobic Angle	105°
Elongation (ASTMD-882)	350%	Visible Light Transmitted	93%
Ultraviolet Rejected	99%	Initial Peel Adhesion (ASTMD-882)	20 N/in
Aging Resistance (UV Test:6000H)	Pass	Chemical Resistance (Acid Test)	Pass
Impact Test (SAE J400)	Pass	Warranty	1 Year

Note: 1. All the above values are nominal and should not be used for specification purposes.
